Christian Salazar,

Front End Developer

Highly motivated and creative developer interested in semantic, accessible markup and maintainable, modular code. I never shy away from a challenge and have mobile-first experience turning designs into fully responsive sites of static/ dynamically loaded content with HTML/CSS/JS/React. I never stop learning and look forward to picking up new frameworks like Vue, Angular, and furthering my backend skills.

SKILLS

Front-end: HTML, CSS, SCSS/Sass, JavaScript(ES6 & beyond), JSON, AJAX, DOM manipulation, React.js (functional and class-based components, React Router, Context API, functional hooks), Bootstrap, TailwindCSS

Back-end: Firebase Firestore, Firebase Auth, Firebase Storage, MySQL database, XAMPP, basic PHP knowledge, Python

Workflow tools: Git version control, Github, Webpack bundler, Parcel, npm, VSCode

PROJECTS

Recipe Scrapbook — 2022

Live version:

serene-northcutt-2e1748.netlify.app

React CRUD app for users to submit/delete recipes with color theme picker and dark/light mode. Connected to Firebase Firestore database.

Skills Used: React.js - CSS - Firebase database

Herbacé — 2021

Live version:

herbace-teas.netlify.app

Mock site for monthly tea subscription service with hero section, product cards, testimonials section, pricing cards, fully responsive mobile navigation, smooth scroll.
